## 2<sup>nd</sup> Symposium of the “ Flore du Cambodge, du Laos et du Vietnam ”

6<sup>th</sup> – 8<sup>th</sup> December 2010 – Hanoi, Vietnam

### Second Circular

The need to organize an international meeting to bring together researchers and users of the Flora has become clearer than ever since new international aid projects began to contribute to our knowledge of the flora of this region. These projects, initiated by the international scientific community demonstrate the interest in the continuation of this Flora.

It follows from the first symposium that new research collaborations are planned: one between the regional institutions among themselves but also with French and foreign institutions. The symposium also provided an opportunity to hold a meeting of editors of Flora in which proposals for collaboration were made. It is envisaged to establish an international scientific committee comprising at least one member of the three countries concerned. This committee will mobilize more efficiently all the forces, to facilitate the work on the development of the Flora of Cambodia, Laos and Vietnam and ensure faster revisions of different plant families.
